

Complex models, study-ready cohorts—delivered with confidence.

Delivered with consistency, oversight, and study-readiness.

Custom murine cohorts—delivered with consistency, oversight, and study-readiness.

BIOSCIENCES**

Complex models, study-ready cohorts—delivered with confidence.

Aged and conditioned cohorts with study-ready consistency.

Neurobiology

Aging unlocks clinically relevant CNS biology

- ▶ Late-onset disease progression & endpoints
- ▶ Neuroinflammation and resilience shift with age
- ▶ Improved relevance for chronic CNS studies

Examples: Alzheimer's • BBB biology

- Neuroinflammation with study-ready consistency

Cardiometabolic Disease

Long conditioning builds stable metabolic phenotypes

- ▶ Consistent obesity and insulin resistance
- ▶ Mature MASH biology and fibrosis progression
- ▶ Durability readouts for chronic dosing

Examples: DIO • MASH

- Dyslipidemia/atherosclerosis

Immunology/ Immuno-oncology

Immune readiness is time-dependent

- ▶ IO response variability is influenced by age
- ▶ Humanized Immune System (HIS) models require extended engraftment + maturation

Examples: Inflammation

- Immuno-senescence • HIS engraftment

Learn more about the how preconditioning services can accelerate your research.

Scan the QR code or visit taconic.com/preconditioning to learn more.

Consistency requires more than time—it requires control:

- ▶ PhD Scientific Consultation Built-in
- ▶ Dedicated Project Management
- ▶ Animal Quality Oversight
- ▶ Reliable Delivery for Complex and GEM Lines

Study-ready cohorts—planned to your schedule.
