Testing is available for the following SNP Panels:

- 1450 SNP mouse marker panel
- B6 Substrain 96 SNP Panel – Only for samples known to be C57BL/6
- Rat 96 SNP Marker Panel – Genetic Monitoring of Rat Strains
- GenMon 98 SNP Panel – Genetic Monitoring of Mouse Strains

Testing Options:

Background Strain Characterization analysis will provide a percentage of the preferred background and approximate generation number of your samples as compared to the specified reference strain. Testing is available on the:

- 1450 SNP mouse panel
- B6 Substrain 96 SNP panel
- Rat 96 SNP Panel
- GenMon 98 SNP Panel

Speed Congenics analysis provides a percentage of the preferred background, and approximate generation number, and a recommendation of those animals to be used for the next breeding cycle.

Testing available on the:

- 1450 SNP mouse Panel
- B6 Substrain 96 SNP panel
