

Custom Microbiota Associations

MICROBIOME EXPERIMENTS IN RODENTS

Taconic Biosciences now offers custom microbiota association (CMA) services to customers.

- ▶ Germ-free mice are associated with client-provided microbiota or selected from offerings within the Taconic Microbiota Repository™
- ▶ Range of available husbandry options for large or small study cohorts and short- or long-term animal studies, including semi-rigid isolators and gnotobiotic Individually Ventilated Cages (IVCs)
- ▶ Taconic is a commercial provider of germ-free mice including:
 - ▶ C57BL/6 (B6)
 - ▶ BALB/c
 - ▶ Swiss Webster
 - ▶ I110 Knockout
- ▶ Custom germ-free derivations are available for client lines or Genetically Engineered Models (GEMs) to generate axenic stock
- ▶ Biospecimen collection services
- ▶ Shipment of conditioned animals or samples to client or CRO at study end
