

TACONIC BIOSCIENCES®

Scientific **Services**

A Dedicated, Interdisciplinary Team Focused on Planning to Ensure the Best Solution for Every Project

Taconic does not subscribe to the “plan as you go” approach to colony management. We believe the ultimate success of a project is first determined at the planning and design stage. Thus, we strive to obtain a full understanding of project objectives, design and execute plans to achieve these objectives, while stewarding customer resources.

This approach is enabled by the collaborative and complimentary interaction of three functional groups: the Scientific Program Management Group, the Strategy Design Group, and the Project Management Group. These teams are further supported by embryology, genetics, molecular analysis, veterinary sciences, and intellectual property subject matter experts. Among these groups are over 20 PhD scientists focused on custom model generation and colony management services alone.

SPECIALIZED TEAMS PROVIDE COMPLETE PROJECT STEWARDSHIP

SCIENTIFIC PROGRAM MANAGEMENT

- ▶ PhD scientists align on project objectives
- ▶ Thoroughly understand and identify project timeline, risks, and resources
- ▶ Ensure project plan is positioned to reach goals

STRATEGY DESIGN GROUP

- ▶ Subject matter experts dedicated to generating detailed project charters
- ▶ Pre-develop contingency plans with itemized resources
- ▶ Embrace and manage risks to improve project outcome

PROJECT MANAGEMENT GROUP

- ▶ Initiate, execute, and manage projects from beginning to end
- ▶ Provide transparent, two-way communication at customized intervals
- ▶ Complemented by on-demand data accessed via eTACONIC®

Key Benefits

- ▶ Specialized teams provide expert support at every project stage to drive success
- ▶ Scientific Program Managers understand project goals, risks, assumptions, and resources
- ▶ Strategy Design Group develops detailed project charters with built-in redundancies
- ▶ Project Managers serve as an extension of your own team, eliminating the need for micromanagement
- ▶ Fully customized communication ensures full alignment with your goals

A NOVEL APPROACH TO COLONY MANAGEMENT

Taconic develops fully customized, robust solutions for our customers' studies based on their specific needs. We place an emphasis on providing comprehensive expertise and resource management you can depend on, allowing you to focus on your research rather than project micromanagement and budgetary woes. We realize this is a novel approach compared to what many are accustomed to, and outline what you can expect when you partner with Taconic:

Needs Analysis & Scoping	Alignment on Best Solution	Onboarding, Execution, and Communication
 <p>Customer contacts Taconic Team with a need, problem, or question</p>	 <p>Scientific Program Manager and Strategy Design Group collaborate on solutions</p>	 <p>Investigator is introduced to their assigned Project Manager</p>
 <p>Taconic Scientific Program Manager engages customer</p>	 <p>Scientific Program Manager presents designs and options to the investigator</p>	 <p>The project is documented and initiated with import of starting material</p>
 <p>Scientific Program Manager and customer scope the project and define success criteria</p>	 <p>Taconic Team guides investigator until aligned on the best technical and business solution</p>	 <p>Taconic Team and investigator agree to a communication plan and regular service reviews</p>

ON-DEMAND PROJECT DATA

Once initiated, eTACONIC® complements every stage of your project with on-demand access to data, further supported by your live Project Manager

LET US PARTNER WITH YOU ON YOUR NEXT BIG DISCOVERY

Schedule a call with Taconic and allow our experts to get to work for you, providing a customized, planning-focused solution that drives success.
