

# Custom Model Generation Solutions

**Tailored to deliver the right model at the right time within your research budget.**

Taconic Biosciences has the most experienced model generation team in the industry. We combine our fully licensed gene modification toolkit with our scientific expertise to create the right custom mouse or rat model for your research program. Beyond superior skills, Taconic is the first comprehensive and integrated model design and colony management services provider in the world.

Our flexible timelines and pricing options, in addition to our commitment to excellence, ensure that we meet your specific needs. Custom model generation is available on all major gene targeting/editing platforms and our expert scientists are available to guide you to the best total solution. Partner with Taconic to maximize your next research investment.

# Advanced model generation services, tailored to your unique project needs

Taconic Biosciences provides a spectrum of solutions tailored to your desired timeline, defined budget, and health standard requirements. Robust quality control measures ensure genetic integrity and confidence throughout each phase of your project.

OVERVIEW OF SERVICES	ExpressMODEL®	STANDARD	FLEX
